

MANIFESTO II: Education

Alfonso C. Hernandez

All education Must be free Including graduate school For all the real students	Then OUR AMERICAN SYSTEM OF EDUCATION Will make us proud
Many children Are not able to learn For lack of intelligence For being born impaired But they are trainable	All administrators Should be in the classroom At least one period a day And should be paid On the same salary scale As teachers
Children should pass From one grade to another Only when they are at grade level In their achievement Regardless of chronological age	All teachers Should teach Only ten years At each level Starting at elementary school Those teachers wishing to progress Must follow a course of study To move up to Jr. High, High School College and University
Since only children Who are wanted Are born Having love And discipline at home They learn the benefits Of knowledge and wisdom In a healthy home	Then All levels Will be prepared With methodology and content Teachers should have The option Of remaining At a particular level
...	
All children Should be tested In grades 4, 8, 12 only And if they do not pass A truly comprehensive test They must repeat one Two years or more Until they are truly prepared.	Money should not be The incentive Equal pay At all levels
	Only experience Education And seniority Will be the basis For progress.
